

## Closing the Patient Care Gap in Autoimmunity: The Clinical Value of New Biomarkers

Room: Hilton Anaheim, California B Room Session Number:HW7

Tuesday, August 06, 2019: 7:00 AM - 8:30 AM

### Speaker(s)

**XAVIER BOSSUYT, MD, PHD**  
Katholieke Universiteit Leuven

Speaker

**ANNA ESLAMI**  
Marketing Manager  
Inova Diagnostics, Inc.

Moderator

**MICHAEL MAHLER, PHD**  
Vice President of Research and Development  
Inova Diagnostics, Inc.

Speaker

**SAVINO SCIASCIA, MD, PHD**  
University of Torino

Speaker

### Description

Clinicians, laboratorians and patients have one goal in common- improving healthcare. Autoimmune diseases are challenging to diagnose due to the seronegative gap, often leading to delays in treatment for the patient. With the development of new biomarkers and technologies, patients can receive a more accurate, earlier diagnosis including valuable information regarding risk stratification. We will discuss new biomarkers for Autoimmune disease and present an advanced technology for multi-analyte testing.

### Tracks:

## Hotel Industry Workshop

---

### Learning Objectives

- Understand the role of new biomarkers in closing the seronegative gap in Autoimmunity.
  - Learn about an advanced technology for multi-analyte testing in Autoimmunity.
-
