BIOLOGIA DEI SISTEMI**

To the attention of:

Mr. Frederic Marquis,
Jardinier Botaniste
Service Conservation
Conservatoire Botanique National Alpin
Domaine de Charance
05000 Gap
FRANCE

In the framework of the Alcotra Seminalp program, we are very pleased to invite you to a training course which will focus on plant inoculation and growth with mycorrhizal fungi that will take place on 29-31 October 2013 at the Department of Torino.

Course content:

On day one, you will learn how to examine the mycorrhizal status of plants and estimate root length percent colonization.

Day two, focuses on laboratory procedures for spore isolation from root-soil inocula by the wet-sieving floatation technique.

Day three will be employed to learn how to culture and multiply AM inocula by the means of trap plants and how to prepare and grow AM-inoculated plants.

Dott. Marco Mucciarelli
