# The blockchain revolution: past, present, and future opportunities

**01** Concerns   **02** Challenges   **03** Opportunities

**Date:** 17.06.2019, 10 am
**Location:** Campus Luigi Einaudi, Lungo Dora 100, Turin 10153, Room D4

# DLT4ALL Project

**DLT4ALL** is a project funded by the Erasmus+ programme of the European Union with the goal to make Blockchain and Distributed Ledger Technologies (DLT) and their applications understandable.

**DLT4ALL** will deliver a **learning platform** with **8 dedicated modules** and **supporting case studies**, online/offline training programme, evaluation and MOOC-style training.

## Target Audience

While DLT and Blockchain can have significant economic and social impact, many European **entrepreneurs**, **angel investors** and **incubator managers** are still not aware of the potential benefits the adoption of these technologies can offer in terms of growth and innovation.

At the same time, University curricula lack real-world cases from the business, investor and startup worlds that would allow **students** to deeply understand and analyse state-of-the-art applications and blockchain-based technologies' innovation potentials.

# Focus on Digital Signatures

**Digital signatures** are a cornerstone of blockchain technology, without which the principles of **transaction integrity** and **user authenticity** could not be assured. It is therefore crucial that all stakeholders have a solid understanding of the basics of this technology and are able to ascertain its safety.

During the meeting we will define **fundamental concepts**, discuss the **state-of-the-art** and present **use cases** of digital signatures technology for blockchain applications.
