## SUMMARY

During the event, the scientific coordinator of the LWA EU project, Francesca Marucco, presented the LIFE WolfAlps EU project and its main actions and goals. Afterwards, she described the status of the wolf population in the Italian alps and neighbouring countries, and presented the national wolf monitoring plan coordinated by ISPRA at the national level and by the LWA EU project at the alpine level. She then concluded the presentation by talking about the communication on the wolf and public perception. The last 50 minutes of presentation were dedicated to answering the many questions made by the participants.
